AIMS AND SCOPE

It is the official vision of the University of Lagos “*to be a top class institution for the pursuit of excellence in knowledge through learning and research, as well as in character and service to humanity*”.

The University in furtherance of, and informed by this vision proclaims the official objective “*to produce graduates who will be well-qualified to operate and develop the public service, engage in industrial management and pursue development and research*”. One of the strategies instituted by the University towards the achievement of this objective is manifested by the publication of a world-class scholarly journal, the *UNILAG Journal of Medicine, Science and Technology*, ***UJMST***.

The *UNILAG Journal of Medicine, Science and Technology* is a peer-reviewed publication with focus on basic and applied research in the physical and biological sciences, medical and pharmaceutical sciences, as well as disciplines of engineering, technology and environmental sciences. The Journal, which is a biennial publication, has an Editorial Advisory Board constituted by eminent scientists and researchers spread across the globe, and accepts original contributions from authors in the global scientific community.

Authors are encouraged to submit manuscripts that typically include descriptions of the problem formulation, the establishment of an appropriate model, method(s) of problem solution, results and applications of interest to ideal practice. Where applicable experimental data are required to be complete and should include sufficient description of experimental set-up, methods and relevant experimental conditions, as well enable replication. Original research papers are hereby invited not only from Higher and Research Institutions in Nigeria but all over the world.
